Ceasy BLUES
part 2

The magic BLUES SCALE

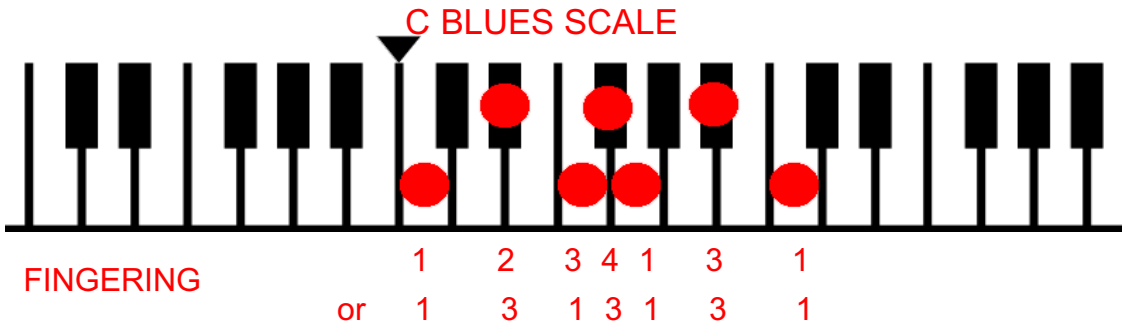
The reason the BLUES SCALE is so useful is that it magically sounds great over ANY chord change in a given key (if you want to sound 'Bluesy' that is)

So, if a song's 'overall key' is C then a C blues scale will sound great with all the chord changes.

Let's look at a C BLUES SCALE that will go with your **Ceasy Blues** chords.

I will explain the why's and wherefore's later on. For now just MEMORISE!

LOOK AT THE VERY **GEOMETRICAL** SHAPE IT MAKES



Another way to look at the scale
